

DEBASIS TRIPATHY

410 cross street Harrison, NJ 07029 | debasis.tripathy@rutgers.edu | +(1) 8622154840

LinkedIn: <https://linkedin.com/in/debasis-tripathy> | github.com/debasistripathy01

OVERVIEW

Senior Software Developer

Adaptable and responsible problem solver with 2.5 years of experience in development domain and 1 year experience in research industry

EDUCATION

RUTGERS, THE STATE UNIVERSITY OF NEW JERSEY

Rutgers Business School- Newark, NJ

May 2026

Master of Information Technology and Analytics

Data Science and Software development

- Data analytics

BIJU PATNAIK UNIVERSITY OF TECHNOLOGY- Berhampur, Odisha, India

August 2020

Bachelor of Technology in Electrical Engineering (Hons.)

Courses

Electrical

(Major) Electrical and Power

Engineering(Honors)

Prediction using LLM

MATLAB simulation models for Photovoltaic panel.

(Minor)Fault detection classification

certifications

CGPA 7.9

RELEVANT PROFESSIONAL EXPERIENCE

Integra Micro Software Services- Bangalore, India

2023 - 2024

Software Developer

- Streamlined the process for change data capture in postgresQL using open source Debezium, docker, Grafanna and Prometheus for buyer application reconciliation settlement process, payment integration using razor pay Kafka communication protocol setup for the CDC Redis high-availability setup along with mongoDB shards and indexing
- *Contact : Veera Reddy (Senior Technical Manager)*

Antino Labs Pvt Ltd- Bangalore, India

2023 - 2023

Software Developer

- *Achievements/Tasks*
- Handled more than two clients(Quicksell and HCL) simultaneously along with managed more than 4 junior developers in backend technology
- developed and scaled the APIs for almost 2 million users for data sorting and filtering developed multiple migration scripts for production database redesigned database for ease of users order services, implemented automatic order cancellation, rescheduling, CI/CD setup for UAT and dev servers socket.io integration with the iDream white board
- *Advised : Sani Yadav (AVP Technology)*

WORK EXPERIENCE

Fabzen Technologies Pvt Ltd- Bangalore, India

2023 - 2023

Software Developer

- Constructed admin panel for Ludo Empire from scratch and collaborated with 3 tech leads to implement a 4 player realtime game event
- Integrated third-party applications for automated user identity verification, implementing queue-based processing to enhance efficiency by 90%
- Designed and executed revenue reports, dashboards, and feedback systems within a week
- Redesigned game scheduler to support over 1 million users. Migrated from round-robin to a queue-based system, handling 100 requests/sec. Integrated Twilio, Mailgun, and SendGrid for SMS and email authentication

Masai School- Bangalore, India

2022 - 2023

Full-Stack Trainee

- Completed intensive bootcamp for 1 year with everyday practical coding for more than 10 hours
- Collaborated on eCommerce application development and Led execution of 7 eCommerce applications with a team of 5-6 members, totaling over 2,300 coding hours.

Siksha O' Anushandhan- Bhubaneswar, India

2021 - 2022

Achievements/Tasks

- Implemented and streamlined processes for multiple hybrid LLM models such as IF- EEMD-LSTM, IF-CEEMDAN-LSTM, Boltzmann Machines, RVFLNN, MK-RVFLNN and improved accuracy by 95%
- Appointed as a project associate to the Department of Science & Technology (DST) smart grid project
- Engineered and executed MATLAB and DSpace models for simulation
- contact person Dr. Pk Dash (Director Research & Consultancy) +91 9437003306

SKILLS

ReactJs, NodeJs, MongoDB, ExpressJs, MATLAB, python, postgresQL, Operating system, Data structure, system design, AWS, CI /CD, Javascript, Typescript, AI / ML, DBMS

ACHIEVEMENTS

IEEE publication on LSTM (ICPEE) (02/2021)

Power Forecasting with Minimal Loss using LSTM and PV Model

Student Member of Institution of Engineers, India (IEI)

Membership awarded due to research proposal of solar water pump in 2019

National Conference Publications (NCGTR, VSSUT) (08/2019)

Published 2 research articles on national conferences related to protection of transmission line

Indian National Academy Engineers (INAE) Mentee (11/2021 - 01/2022)

Selected among 60 students nationally and conducted research with Deep Neural Networks and Smart Grid

Mentoring Interns (08/2023 - 09/2023)

Mentored more than 6 interns regarding industry 4.0 architecture of Front-end using react, redux

SPECIAL PROJECTS

Licious, ASOS, Myntra

2021 - 2022

- Forecasted and accomplished deep semantic model of Smart Grid Power and improved optimization with Deep neural net hybrid LSTM (research work)
- Executed 6 clones of ecommerce websites by collaborating with 4 junior developers

PERSONAL PROJECTS

Robotics remote controlled car using Arduino Mega-2560 (group work)

Quadcopter using FS-i6 and Arduino mega, bmp-180 (group work)

CERTIFICATES

Advanced Python Programming (EICT, IIT Kharagpur)

Deep Neural Networks (EICT, IIT Roorkee)

Machine learning & data analytics using python (EICT, IIT Roorkee)

Full-stack development (Masai School)

Full-stack industry training

LANGUAGES

- **Professional Proficiency:** English

RELEVANT COURSEWORK

- Data structures, Machine Learning, Discrete learning, Deep Learning and Neural Networks, Data Mining, Business Forecasting, Statistical Learning

ADDITIONAL

INAE (11/2021 - 02/2022)

Research Mentee guided by Prof Dr. PK Dash
