EDUCATION

RUTGERS, THE STATE UNIVERSITY OF NEW JERSEY

Rutgers Business School- Newark, NJ

GPA 3.2 / 4 May 2026

Master of Information Technology and Analytics

- Relevant Coursework: Information Security, Data structures, AI, Business forecasting, Data Mining, Supply chain management

BIJU PATNAIK UNIVERSITY OF TECHNOLOGY

August, 2020

Bachelor of Technology in Electrical Engineering, August 2020

SKILLS & CERTIFICATIONS

- Agentic AI, AI / ML, ReactJs, NodeJs, MongoDB, ExpressJs, Python3, PostgresQL, AWS, CI /CD, Javascript, Typescript
- Advanced Python Programming 2020
- Full-Stack Development, 2022

PROJECTS

PRORESUME (proresume.us)

- Built a one-stop career platform helping students with AI-powered resumes, cover letters, SOPs, university insights, and career roadmaps.
- Designed and deployed full-stack architecture using React.js, Node.js, Express.js, and MongoDB with CI/CD pipelines (Docker, Nginx, Jenkins).
- Integrated agentic AI systems with ETL pipeline and Retrieval-Augmented Generation (RAG) to generate personalized career documents and guidance
- Scaled platform to handle real-time user traffic while ensuring responsive UI/UX and secure authentication (Google OAuth 2.0, Passport.js).

GLOBALNEUROLAB (globalneurolab.com)

- Developed EEG signal classification pipelines using the CHB-MIT dataset for seizure detection.
- Implemented data preprocessing, feature engineering, and ML/DL workflows in Python (Pandas, NumPy, Scikit-learn).
- Built monitoring and visualization tools for EEG data, integrating cloud storage (AWS S3) and streaming pipelines.
- Researched and deployed hybrid LLM + RAG + ETL frameworks to support medical research queries with multimodal data

EXPERIENCE

INTEGRA MICRO SOFTWARE SERVICES

Bangalore, India

Software Developer

2023 - 2024

- Streamlined process for change data capture in PostgresQL using open source Debezium, Docker, Grafana and Prometheus for buyer application reconciliation settlement process
- Implemented payment integration using Razor Pay Kafka communication protocol setup for CDC Redis high-availability setup along with MongoDB shards and indexing
