

## DEBASIS TRIPATHY

Harrison, NJ | [debasis.tripathy@rutgers.edu](mailto:debasis.tripathy@rutgers.edu) | 862-215-4840

LinkedIn: <https://linkedin.com/in/debasis-tripathy> | [github.com/debasistripathy01](https://github.com/debasistripathy01)

Aspiring Full stack developer with 3+ years of industry experience in the relevant domain

### EDUCATION

#### RUTGERS, THE STATE UNIVERSITY OF NEW JERSEY

Newark, NJ

##### Rutgers Business School

Master of Information Technology and Analytics, May 2026

#### BIJU PATNAIK UNIVERSITY OF TECHNOLOGY

Berhampur, India

Bachelor of Technology in Electrical Engineering, August 2020

### EXPERIENCE

#### INTEGRA MICRO SOFTWARE SERVICES

Bangalore, India

##### Software Developer

2023 - 2024

- Streamlined process for change data capture in PostgreSQL using open source Debezium, Docker, Grafana and Prometheus for buyer application & reconciled settlement processes
- Implemented payment integration using Razor Pay Kafka communication protocol setup for CDC Redis high-availability setup along with MongoDB shards and indexing

#### ANTINO LABS PVT. LTD.

Bangalore, India

##### Software Developer—Clients: Quicksell and HCL

2023

- Managed Quicksell account to develop APIs for ~ 2M users for data sorting and filtering, as well as multiple migration scripts for production database redesigned database for ease of users order services
- Designed healthcare system for HCL that streamlined health insurance processes for its 1K+ current employees with future capacity of 1M+ employees
- Implemented automatic order cancellation for HCL, redesigned scheduling, and set up CI/CD for UAT and dev servers socket.io to integrate with iDream white board

#### SIKSHA O' ANUSHANDHAN UNIVERSITY

Bhubaneswar, India

##### Research Assistant, Electrical Computer Engineering

2021 - 2022

- Implemented processes for 11 hybrid LLM models—including IF- EEMD-LSTM, IF-CEEMDAN-LSTM, Boltzmann Machines, RVFLNN, MK-RVFLNN—that improved accuracy by 95%
- Appointed as Project Associate to Department of Science & Technology to manage Indian government's smart grid project that improved fault tolerance of electrical transmission line, projected to be implemented in state of Orisa (30M residents)

### SKILLS

- ReactJs, NodeJs, MongoDB, ExpressJs, MATLAB, Python, PostgreSQL, Operating System, AWS, CI /CD, Javascript, Typescript, AI / ML, and DBMS

### CERTIFICATES

- Advanced Python Programming (EICT, IIT Kharaghpur), 2020
- Full-Stack Development (Masai School), 2022
