

DEBASIS TRIPATHY

Kearny, New Jersey | debasis.tripathy@rutgers.edu | +1 (862)-215-4840

LinkedIn: <https://linkedin.com/in/debasis-tripathy> | github.com/debasistripathy01

Data and Software Engineering professional with 2+ years of experience in full-stack development, data integration, and process automation in health and pharma domains. Skilled in applying data-driven and engineering principles to improve systems performance, automation, and operational efficiency.

EDUCATION

RUTGERS, THE STATE UNIVERSITY OF NEW JERSEY GPA-3.9/4 Newark, NJ
Masters of Information Technology and Analytics May 2026

Coursework: Data Structures, Data Mining, Business Forecasting, Information Security, Deep Learning, Supply Chain Analytics **SAP/ERP**,

Projects: [Rutgers Health hack 2025](#)-Runnerup (Team 24), [ProResume](#) (Resume templates for students), Security Analysis with SIEM (ELK), Predictive Analytics for Process Optimization

SKILLS

Javascript, Typescript, Python, PostgreSQL, MongoDB, React.js, Tailwind CSS, Node.js, Express.js, AWS, Docker, CI/CD, Git, AI / ML, Process Optimization, Agile Development

LEADERSHIP & CAMPUS INVOLVEMENT

RUTGERS UNIVERSITY — NEWARK

Graduate Teaching Assistant, Department of Information Systems August 2024 – Present

- Assisting professors in conducting exams, grading assignments, and mentoring undergraduate students in cloud computing subject.

President, International Students **Organization** (OISS), RU–Newark Sep 2024 – Present

- Leading a community of 400+ international students, organizing orientation programs, cultural events, and mentorship initiatives.

- Hosting and coordinating university-wide **Hackathons and Tech Innovation Events**

EXPERIENCE

INTEGRA MICRO SOFTWARE SERVICES India
Software Developer 2023 - 2024

- Automated data capture and monitoring pipelines (PostgreSQL, Debezium, Docker, Grafana) to improve transaction tracking and settlement efficiency — aligning with continuous improvement and data-flow optimization principles used in supply-chain operations
- Designed and implemented **data capture pipelines and process monitoring** using PostgreSQL, Debezium, Docker, and Grafana, enhancing system reliability by 25%.
- Implemented payment integration using Razorpay Kafka communication protocol setup for CDC(change data capture), Redis high-availability setup with MongoDB sharding and indexing

ANTINO LABS PVT. LTD. India
Software Developer—Clients: Quick-Sell and HCL 2023

- Managed QuickSell account to develop APIs for ~ 200K users for data sorting and filtering, as well as multiple migration scripts for production database redesigned database for improved user order service efficiency.
- Contributed to **process design and system validation**, aligning with engineering quality.
